

Position Open --

Statistician With Expertise in *Causal Modeling*

The Medical Technology and Practice Patterns Institute (www.mtppi.org), a non-profit health care research organization, seeks a qualified candidate for the position of Senior Statistician.

The position of statistician/biostatistician is open to candidates holding a Ph.D. or Master's degree in statistics. The specific statistical expertise required is theoretical knowledge and demonstrated use of one or more of the following techniques for ***causal model estimation in the presence of time dependent confounding***: *g-estimation, dynamic treatment regimens, marginal structural models, and structural nested models.*

Publications demonstrating the candidate's competence in the area of causal modeling are essential. Additional skills that are highly recommended for the qualified candidate are a history of successful grant writing and, in particular, the application of causal modeling techniques to address various hypotheses.

Qualified candidates should submit curriculum vitae to: Search Committee, MTPPI, 4733 Bethesda Avenue, Ste 510, Bethesda, MD 20814 or via e-mail to inquiry@mtppi.org. We offer a competitive salary and comprehensive benefits package. MTPPI is an EOE.
